

Prozentrechnung I

Berechne p%, wenn G der Grundwert und P der Prozentwert ist.
Arbeite auf einem Karoblatt.

1) $G = 96,07 \text{ m}^2$ $P = 42,80 \text{ m}^2$ $p\% = \underline{\hspace{2cm}}$

2) $G = 47,44 \text{ m}^2$ $P = 95,28 \text{ m}^2$ $p\% = \underline{\hspace{2cm}}$

3) $G = 26,77 \text{ €}$ $P = 2,79 \text{ €}$, $p\% = \underline{\hspace{2cm}}$

4) $G = 78,60 \text{ m}^3$ $P = 56,66 \text{ m}^3$ $p\% = \underline{\hspace{2cm}}$

5) $G = 68,90 \text{ m}^2$ $P = 19,25 \text{ m}^2$ $p\% = \underline{\hspace{2cm}}$

6) $G = 76,72 \text{ m}^3$ $P = 40,90 \text{ m}^3$ $p\% = \underline{\hspace{2cm}}$

7) $G = 27,50 \text{ kg}$ $P = 43,32 \text{ kg}$ $p\% = \underline{\hspace{2cm}}$

8) $G = 13,64 \text{ €}$ $P = 15,67 \text{ €}$ $p\% = \underline{\hspace{2cm}}$

9) $G = 72,20 \text{ kg}$ $P = 27,97 \text{ kg}$ $p\% = \underline{\hspace{2cm}}$

10) $G = 18,70 \text{ €}$ $P = 2,69 \text{ €}$ $p\% = \underline{\hspace{2cm}}$
